**Arthroplasty: Finger or Thumb Joint Replacement**

**Post Operative Rehabilitation Protocol**

**Following Surgery:**
- Expect a bulky surgical dressing and splint to be applied to hand and wrist to be kept in place for 10-14 days.
- Elevate and ice for at least 3 days.
- Continue to elevate as often as possible until your next clinic visit. (Elevate above your heart.)
- Shower with a plastic bag covering the splint and seal with tape.
- Take your pain medicine as needed and as prescribed. Call if any problems or questions arise.

**3-5 Days Post Op (at therapy):**
- Initiate gentle ROM (range of motion) exercises.

**10-14 Days Post Op:**
- Follow up appointment in clinic with P.A. or M.D.
- Dressing, splint, and sutures will be removed.
- Expect a custom-fabricated dynamic extension splint for daytime and a static splint for nights.
- Initiate "radial walking" (active finger radial deviation).
- Begin home exercise program as instructed by therapist.

**6 Weeks Post Op (at therapy):**
- May initiate stretching exercises and gentle hand strengthening exercises with soft putty.

**8 Weeks Post Op:**
- Follow up appointment in clinic with P.A. or M.D.
- Expect x-ray to evaluate healing.
- May discontinue dynamic extension splint, but may continue static splint at nights for up to 12 weeks depending on progress.
- Return to normal activities as tolerated.

**12 Weeks Post Op:**
- May discontinue static forearm splint at nights.
